Where Will You Buy Your Range? From a Peddler or From Your Dealer

THE PEDDLER—WHO IS HE?

You don't know! don't know where he came from, or where he will go after he leaves you. He has no interest in your locality. PAYS NO TAXES. All you know about his range, and the responsibility of the company who makes it, is what he tells you. And in many cases the company he claims to represent don't make the range at all—they are made under contract.

In order to overcome your natural objection to buying from a stranger, he will offer many inducements, and tell you many plausible things.

He may say you can have as long as you like to pay for your range, that the paper you are asked to sign is only a receipt. Don't believe him—IT'S A NOTE, and you'll have to pay it when due.

He may say he will board out some of it, or take your old range in part payment. It's absurd. He would not know what to do with your old range if he had it, and when his sale is made, he'll get out of the country as quickly as possible.

He may say that his range is as good, or better than, The South Bend Malleable. Tell him if this were true responsible dealers would handle it. Who ever heard of an article of true merit being peddled? Invite him to bring his range over to your dealer's and place it beside The South Bend Malleable. Tell him if after comparing it with your dealer's range you find his range is the best you will buy it. Take our word for it this is the very last thing he would care to do.

He may say it costs more to make his range—that's why it sells for more. Remind him that poor business management in manufacturing and expensive marketing can increase the cost of any article without adding to its value.

YOUR DEALER—WHO IS HE?

You know him, he's your neighbor. He pays taxes and is a respected and useful citizen. You know if he did not handle goods of real merit he would fail in business. For this reason you know he has satisfied himself as to the merits of The South Bend Malleable before he would agree to handle them.

He don't have to make unreasonable promises to make a sale. He knows you will find out if the range is not all he represents it to be, and you will know where to find him if it is not.

He will let you take the range home and use it. He knows you would not let it go out of your house after giving it a trial.

He will show you that The South Bend Malleable outranks the peddler's range at every point in design, material and construction.

He will show you that The Patented Keystone Copper-Bearing Aluminum-Fused Flues represent the greatest protection known against rust, coal gases and corrosion.

He will show you why a range of such high grade as The South Bend Malleable can be sold at a reasonable price. He'll tell you of the largest exclusive range factory in the world; of its modern equipment in machinery, designed and made especially to build Malleable Ranges; of Malleable Range experts who have been making ranges for a lifetime; of ample capital to do business with.

HERE IS WHAT WILL HAPPEN IF YOU BUY

OF THE PEDDLER

- 1—You will pay more for your range.
- 2—You'll get a range that will not bake half as good as The South Bend Malleable.
- 3—You'll get a range that will not last half as long as The South Bend Malleable.
- 4—You'll get a range that will burn more fuel than The South Bend Malleable.
- 5—When a part burns out, or is broken, you'll not be able to find the man who sold the range to you—you'll have great trouble in getting it replaced.

OF YOUR LOCAL DEALER

- 1—You will pay less for your range.
- 2—You will get a range that will bake twice as good as the peddler's.
- 3—You will get a range that will last twice as long as the peddler's.
- 4—You will get a range that will burn less fuel than the peddler's.
- 5—And if an accident should happen, and anything go wrong with the range, you will know where to find the man who sold it to you. You know he's responsible.

NOW FROM WHOM WILL YOU BUY—PEDDLER OR DEALER? FROM YOUR DEALER, OF COURSE!

You are invited to drop in and see our complete line of South Bend Malleable Ranges. After you have taken time to look over and examine them carefully you will be convinced that it would be possible to make a range as good as the South Bend Malleable unless its original design were the same, and was it made under the same manufacturing conditions.

Price of Peddlers' Ranges about \$80.00
